About Cogito

Cogito's Relationship Analytics products allow organizations to leverage their existing data structures and applications and identify previously unknown links and sub groups buried deep in generations of structured and unstructured data. Cogito's Knowledge Center provides a robust framework of application services that allow businesses to improve their data analytics and decision-making capabilities by overcoming the limitations of SQL and relational database technology. The Cogito Knowledge Center allows a dynamic schema that can be updated, changed or reorganized at a moment's notice to reflect an ever-changing business environment.
